

Race Studio 3 Release history

Page 1

Version	Date	Change/additions
3.13.00	Jan, 18th 2017	Configuration <ul style="list-style-type: none">▪ New features added:<ul style="list-style-type: none">▪ ECU driver Builder▪ GSP_POS_Accuracy channel is available for display and CAN output (new firmware 1.22.99 for MX family and EVO family is required)▪ New RPM scales for 'Rally Page'▪ Tire temperature sensor▪ Minor bug fixed
3.12.15	Dec, 6th 2016	Download <ul style="list-style-type: none">▪ Fixed bug that could generate data shift of some channels only in case of multiple download Configuration <ul style="list-style-type: none">▪ Bug fix: GPS Speed could not be selected from channels expander dropout
3.12.14	Dec, 2nd 2016	Configuration <ul style="list-style-type: none">▪ Fixed bug for which in some cases the slaves configuration, upon transmission, could not be forwarded to slave units▪ Fixed crash in settings window that could happen for all devices, improved also settings filter to avoid useless parameters repetitions Download <ul style="list-style-type: none">▪ Fixed management of test types during download, now the software correctly keeps last user choice▪ Minor fixes in download window tooltips and in error messages management (messages could be erroneously shown more than one time)▪ Fixed bug for which the csv exports in RS3 download could offer a low precision in timing▪ Improved csv exports to manage also GPS position accuracy▪ Fixed bug for which there could be few bad samples at the end of the drk xrk/drk/csv files for high frequency sampled channels Tracks <ul style="list-style-type: none">▪ Minor fixes in nations management (i.e. Aruba)▪ Minor fix in track creation window to allow a name change referring only to letters case (i.e. monza -> Monza)▪ Fixed bug for which tracks filter could not be saved and tracks list could not be correctly updated after a change in nations settings

Race Studio 3 Release history

Page 2

Version	Date	Change/additions
3.12.10	Nov, 22nd 2016	<p>Configuration</p> <ul style="list-style-type: none">▪ Improvement: in the download window the error message that is prompted in case of problems has been made more meaningful for determining what happened▪ Fixed bug in download that could lead to crashes when exporting to MatLab format▪ Fixed bug for which, during download, in case of big ".xrk" files, the conversion to ".drk" could lead to bad values in logged channels▪ Some minor fixes (tooltips and drawing imperfections) in the download window in case of mov files download from SD or SmartyCam <p>Analisis</p> <ul style="list-style-type: none">▪ Fixed bug for which the satellites number in analysis saturated to a maximum number of 20, while GPS08 receivers can go over that number due to the use of more constellations (GPS-Glonass) than the GPS05 (GPS only)
3.12.06	Nov, 11th 2016	<p>Download</p> <ul style="list-style-type: none">▪ Fixed bug for which RS3 could show a warning message on max 100 MB download in wrong cases and other improvements <p>Tracks</p> <ul style="list-style-type: none">▪ Faster tracks download from web <p>Configuration</p> <ul style="list-style-type: none">▪ Fixed bug in alarm settings: it wasn't possible to manage colored measures
3.12.00	Oct, 25th 2016	<p>Download</p> <ul style="list-style-type: none">▪ Improved data download speed: USB comm speed, data conversion from xrk (logged by devices) to drk (for RS2Analysis)▪ Added possibility to merge several xrk files into one single drk file▪ In download window now it's possible to skip automatic selection of sessions made of one single lap, like it was in RS2▪ Fixed bugs that could lead to crashes in case some different output format (eg. MatLab or NI) was selected in download phase▪ Automatic naming for downloaded xrk files now let users avoid automatic insertion of original file name and logger ID into file name <p>Tracks</p> <ul style="list-style-type: none">▪ Fixed bug for which it was impossible to save a new track when it was open shaped and very long (longer than 16 km)

Race Studio 3 Release history

Version	Date	Change/additions																																																																
		<ul style="list-style-type: none">▪ Added possibility to modify an AiM track into a user track in case anyone would want to modify the track shape▪ During track creation/modification now the RS3 better checks if the beacon position is compatible with the track shape loaded, and coordinates edit boxed better allow for decimal figures▪ During track creation, upon request to users to share data with AiM, now the shape of all laps (instead of the shape of one single lap) is shared. This for AiM labs to have more data to release a better map																																																																
		Configuration <ul style="list-style-type: none">▪ Fixed bug for which it was possible for users to enter channel names using non ASCII fonts▪ Minor bug fixes in configuration management▪ Added alert window to inform the user that replacement of original instrumentation cluster may disable some of the bike functions▪ In channel settings window it is now possible to set also the short name																																																																
		Analysis <ul style="list-style-type: none">▪ Bugfix in RS2Analysis to avoid the measure units change in potentiometer channels, that sporadically occurred to some customers																																																																
		General <ul style="list-style-type: none">▪ Fixed some bugs for which the software could crash while closing and prevent a new instance from being run▪ While closing the software the main window is kept open untill all internal memory cleanup is finished▪ ECU stream released:

BOSCH	MS44_SP_T_44CSTX20	All	Change CAN bus setting

3.08.11

Mar, 23rd 2016

- Fix on potentiometers management, the travels of which could result zeroed upon software or firmware updates
- Fix on user interface: previously it was possible to delete AiM tracks
- Fix on user interface: RS3 prompts a message box when trying to export a configuration being modified
- Fix on custom sensors: after renaming a custom sensor a RS3 restart was needed before being able to open the sensor again
- New tracks added
- Minor improvements

PEUGEOT	Funyo_sp05	All	
JAS	TCR	All	
TURNER	CUSTOM	All	

▪ Upgrade/Bug Fix ECUs:

Manufacturer	Model	Compatib.	Description
TOMS	DOME_FIA_F4	All	
MOTEC	M84	All	Add USER 2 channel defined as oil temperature
HALTECH	CAN_V2	All	Fix Bug related on Engine state channel
MARELLI	PROTO_V8	All	Update all channels list
SC	TYPHOON_TORNADO_V3	All	Fix Bug related on speeds channels

3.05.02

May 27th 2015

- MXG/MXS display pages improvements:
 - New Rally Page
 - Added possibility to show odometers and different time fields
- Minor bug fixed

▪ Released the following ECUs:

Manufacturer	Model	Compatib.	Description
MICROTEC	TM	All	
BOSCH	Tuner MS4 E46 M3	All	
FAST	XFI	All	
GM	C7_STINGRAY	All	
MECTRONIK	MK_E7	All	
FUEL_TECH	CAN	All	
MARELLI	FORMULA_MASTERS_CHINA_SERIES	All	
TEVES	MK60_ABS_MS	CAN2	
TEVES	MK60_ABS_STD	CAN2	

▪ Upgrade/Bug Fix ECUs:

Manufacturer	Model	Compatib.	Description
TOYOTA	GT86/SCION_FRS	All	Correction bug related to Water temperature offset
AUDI	CAN_PQ35_P5	All	Added oil temperature 2 channel
MARELLI	SRA_SRAE_SRT	All	Fixed bug related to ECU channels management

Race Studio 3 Release history

Version	Date	Change/additions
3.05.00	May 11th 2015	<ul style="list-style-type: none">▪ New web updates management: now it is possible to download device firmware even if no device is connected. Devices will be updatable once connected▪ Now it is possible to show odometers and lap times information on the display and to remove undesired fields▪ Improved start data recording management in order to avoid possible recording failure conditions due to lap channels and odometers▪ New encryption management for the configuration of CAN2 and CAN1▪ Added math channel to use precalculated gearings▪ Introduced 'Clone' possibilities for configurations▪ Fixed decimal figures management in analysis of drks from MXG-MXL2: now all places in which a channel is shown are coherent▪ Improved autoselection management of xrk files in download window▪ Improved test properties and forced values management in RS3 download window▪ Improvements and fixes in management of deletion of alarms and math channels▪ Minor improvements in user interface▪ Minor improvements in the configuration of MXL2 display

- Released the following ECUs:

Manufacturer	Model	Compatib.	Description
ALFA ROMEO	4C	MXL2 MXS MXG	
TOMS	DOME_FIA_F4	MXL2 MXS MXG	

- Upgrade/Bug Fix ECUs:

Manufacturer	Model	Compatib.	Description
MBE	9A8998CAN	MXL2 MXS MXG	Correction bug related to 6th gear management
MBE	9A9CAN	MXL2 MXS MXG	Correction bug related to 6th gear management
